

INTERNSHIP PROGRAM

Summer 2022-2023

QuantX Labs has its roots in the university sector, and we maintain a passion to develop emerging talent and enhance the capability of Australia's quantum and space sectors.

We are looking for exceptional science and engineering students that have both a history of hands-on experience and strong academic performance, as well as business students keen to get some hands-on experience on the corporate cogs of a South Australian SME.

We aim to provide you with experience in at the cutting edge of the tech sector that you cannot get a university setting.

The QuantX Labs internship program is held between December 2022 and March 2023. Internships are available for a range of disciplines from atomic and laser physics to mechanical or software engineering. All disciplines are encouraged to apply but places will be highly competitive. Internships will be prioritised for students in the final year of their undergraduate study and enrolled graduate students.
